Globant
SSR PHP Developer
abril de 2012 - marzo de 2013 (1 año)

Trabajé en 2 proyectos.

El primero fue para Turner en las oficinas del cliente haciendo un cambio completo del diseño de sus aplicaciones web. (Frontend Dev - html, css, smarty, js)

El segundo fue para Konami. Desarrollamos un sitio para la comunidad su gamers. (Backend, Frontend Dev y Techincal Leader - PHP5, Zend Framework)

TeraCode
PHP and Groovy Grails Developer
agosto de 2011 - abril de 2012 (9 meses)

I worked for 3 projects during that period.

The first one was to continue the development of a backend app using CakePHP, MySQL, Jquery, SVN in a Linux enviroment.

The other two were enterprise projects using the Groovy Grails framework, MySQL, GIT also in a Linux enviroment.

I had the chance to put into practice Agile (SCRUM) methodologies such as daily meetings with my teammates and clients, retrospective and I also participated in sprints estimation.
I worked with small and medium teams always getting good feedback.

Tomadato
JR PHP Developer
abril de 2008 - agosto de 2011 (3 años 5 meses)

This was my first job in the software programming field. My tasks involved the devolpment of new features and maintainance of old ones for their internal web application. This backend app was built using PHP 4, MySQL, Javascript, Jquery, CSS, HTML and it its goal was to process and generate reports of all the audited data.
